

### **...or create a new repository on the command line**

```
echo "# Machine-Learning-A-Z" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/gaukhar98/Machine-Learning-A-Z.git
git push -u origin master
```

### **...or push an existing repository from the command line**

```
git remote add origin https://github.com/gaukhar98/Machine-Learning-A-Z.git
git push -u origin master
```

### **...delete files in repository from the command line**

```
git rm missing_data.py
git commit -m "delete missing data old file"
git push -u origin master
```

### **...add modified files in repository from the command line**

```
git add -u
git commit -m "add changes"
git push -u origin master
```
